This week the median list price for Concord, CA is \$386,500 with the market action index hovering around 83. This is an increase over last month's market action index of 81. Inventory has decreased to 12.

**MARKET ACTION INDEX**

This answers "How's the Market?" by comparing rate of sales versus inventory.

**Strong Seller's Market**

While the Market Action Index shows some strengthening in the last few weeks, prices have settled in a bit of a plateau. We are currently in a Seller's market so prices will likely resume their climb should this trend persist.

\$372,900	756	0 - 4,500 sqft	2	1	38	2	3	0
\$275,000	652	-	1	1	43	1	3	42

MEDIAN LIST PRICE

The market seems to have paused around this plateau. The Market Action Index is a good leading indicator for the durability of this trend.

SEGMENTS

Prices have generally settled at a plateau, although Quartile 1 has been trending a bit downward in recent weeks. We'll need to see a persistent shift in the Market Action Index before we see prices across the board move from these levels.

PRICE PER SQUARE FOOT

The market plateau is seen across the price and value. The price per square foot and median list price have both been reasonably stagnant. Watch the Market Action Index for persistent changes as a leading indicator before the market moves from these levels.

INVENTORY

Inventory has been falling in recent weeks. Note that declining inventory alone does not signal a strengthening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is changing with the available supply.

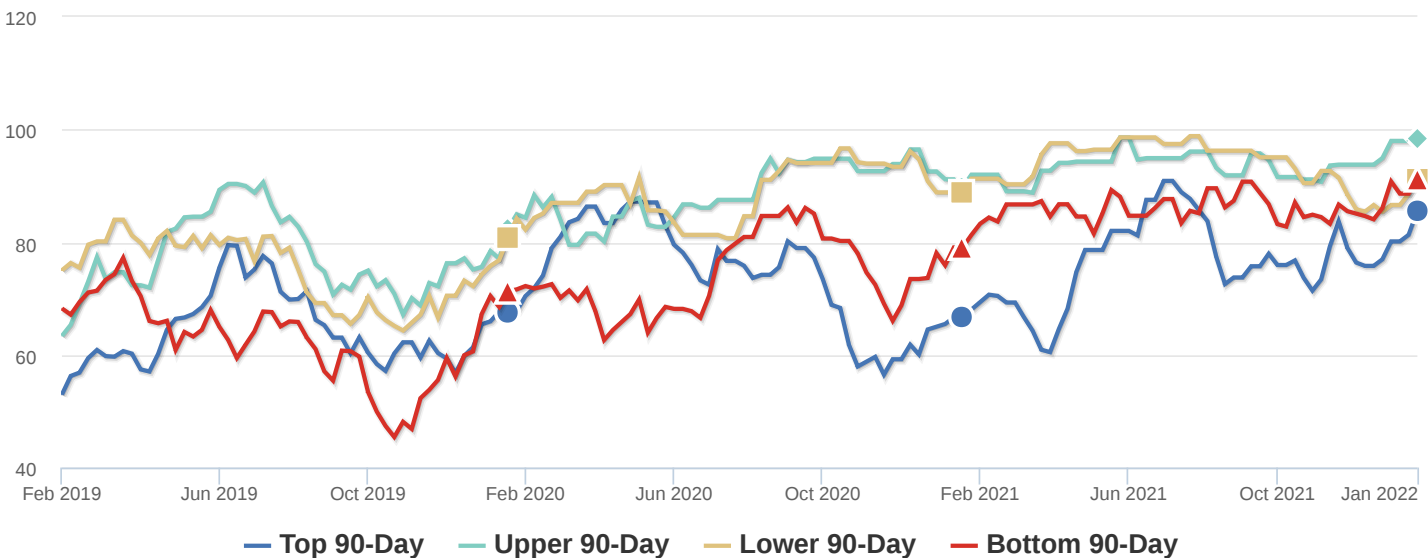

MARKET ACTION INDEX

While the Market Action Index shows some strengthening in the last few weeks, prices have settled in a bit of a plateau. We are currently in a Seller's market so prices will likely resume their climb should this trend persist.

MARKET ACTION SEGMENTS

Not surprisingly, all segments in the market are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

MEDIAN DAYS ON MARKET (DOM)

The properties have been on the market for an average of 31 days. Half of the listings have come newly on the market in the past 19 or so days. Watch the 90-day DOM trend for signals of a changing market.

SEGMENTS

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.
